Introducing the new surface tension arcade and media table...

Designed to discreetly bring the finest contemporary entertainment to the heart of your living space.

Available in Walnut and Oak as well as high-gloss black and white... plus custom requirements catered for.

A little effort goes a long way...

The all-new surface tension table comes with all-new revolutionary controls. Just pull the front panel out on it's super-smooth runners and watch as the control panel rises up to meet the challenge.

The controls are genuine arcade parts, destined to take all the man-hours that you're willing to throw at them. If you're interested... Sanwa joysticks and Happ buttons and trackball. Pre-installed with over 60 games that defined the button-bashing generation.

PC or no PC...

The brains of the operation are stored away inside the table, accessed by a discreet push-click door. The whole system can be customised to your specification, but comes as standard with enough processing power, memory and hard disc space to keep you going for years to come. If you choose to upgrade it yourself afterwards, it's simple.

If you'd rather be in complete control, you can fit your own PC with our new option...

retro-fit

Designed to take the [Shuttle](#) range of PCs, you can build your PC however you like.

How does it sound?

The audio is taken care of by the new sound department. Powered by a custom 2 x 50w amplifier, the separately mounted woofers and tweeters will kick out enough sound to keep your parties going well into the night.

**How? Where?**

surface tension tables are available to buy online securely, with free delivery in England. Also available to view and buy from onedeko in London.
